Subject: Attached Application for RMDZ Renewal

Dear Ms. Pintar:

Thank you for your assistance in renewing Ventura County's status as a Recycling Market Development Zone. As indicated by the attached documents, the Ventura County Board of Supervisors and each of the city councils in Ventura County have requested this renewal by passing resolutions indicating their desire to remain in the re-designated Ventura County Recycling Market Development Zone. The enclosed application is being submitted to request that the California Integrated Waste Management Board approve renewal of the Ventura County Recycling Market Development Zone.

We have also included the Notice of Determination showing our compliance with the California Integrated Waste Management Board's interpretation that zone renewal is an action requiring compliance with the process mandated for certain "projects" by the California Environmental Quality Act (CEQA). After an initial study, we determined that the most appropriate CEQA document for this "project" was a Negative Declaration.

We look forward to continuing to work with you and the staff of the California Integrated Waste Management Board.

Sincerely,

Kay Martin, Director
Ventura County Environmental and Energy Resources Department
